

### [Kingsdown School's App](#)

The Kingsdown School Mobile App is designed to keep you well informed about your child's education and life in general at school, and to help cut down on paper and ink consumption.

We post school news, events, curriculum information, contact details and it is also used to send important messages such as school closures. It is a public app which means that anyone can download it to their 'phone or tablet.

A step by step guide to downloading and using the app is shown below.

### [How to download the Kingsdown App](#)

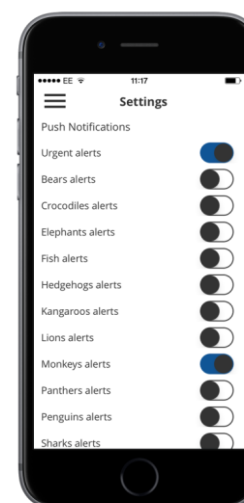

You can get the app if you have an Apple or Android phone and/or tablet.

- Visit the Apple App Store or Google Play on your device and search for "Kingsdown School".

You may download the app onto multiple devices but will need to install it separately on each device.

### [Key Tips](#)

- Start by visiting the Settings page (see right, reached via 'More' tile on the Home page) and turn on the year groups you are interested in. The app will then alert you to relevant messages in these categories. Please leave the Urgent alerts category turned on. This is for messages from the Headteacher and school to everyone about urgent matters.
- The Timeline tile contains a record of the alert messages you have been sent by the school. The circular counter on the app shows how many unread messages you have.
- It is a good idea to close the app when not in use. This allows the content to refresh meaning you will not miss any urgent messages as alert messages pop up on your phone even when the app is off.

You can find a more detailed guide to navigating the app in the Information section of the app itself.
